

Module 1 - Recap card

Web browsers

A **web browser** is software that enables users to access the Internet (for example, Google Chrome, Mozilla Firefox, Microsoft Edge, Safari, Opera, etc.).

A **search engine** is an online tool that uses a browser to find information on the Internet using keywords (for example, Google, Yahoo, Bing, DuckDuckGo, Ecosia, etc.).

The main features of a web browser

- **The address bar** : to enter the URL of a site or carry out a search
- **Tabs** : to open several web pages at the same time
- **Favourites** : to save websites and access them more quickly
- **Browsing history** : to find previously visited sites more easily.
